The Engineering Design Process

1. **Ask**
   - What is the problem?
   - What have others done?

2. **Imagine**
   - What are some solutions?
   - Choose the best idea.

3. **Plan**
   - Draw a diagram.
   - Decide what materials I will need.

4. **Create**
   - Build my design.
   - Test it out.

5. **Improve**
   - How can I make my design better?
   - Try again!

The Goal

Try again!
